■ Hit Rate: The probability of winning money

■ Free Game Rate: The probability of getting free spins

■ Max Exposure: Highest Recorded Multiplier simulated in 1 billion spins.

■ Max Multiplier / Payout : When the prize reaches one of the two values, it will be capped and stop being awarded.

■ Built-in games: Integrated within the game console, featuring non-traditional gameplay designs (e.g., double or nothing, rock-paper-scissors, and other luck-based mini-games)

■ Mission Bonus System: Players who meet specific conditions in the game will be eligible for the distribution of additional bonuses (not included in the RTP expenses, controlled by the bonus pool).

When players spin 3 or more "wilds", they can win a free mode. Before starting the free mode, one of the symbols will be randomly selected and upgraded to "expanding symbols". These "expanding symbols" will occupy a row until the free mode ends.
